

SECONDARY EDUCATION

We prepare students to teach, change lives, and impact communities. The Secondary Education Licensure program is for students who are interested in teaching individuals in grades 7-12. Licensures are offered in biology/life science, chemistry, integrated language arts, integrated math, integrated science, and integrated social studies.

BEYOND THE CLASSROOM

HANDS-ON EXPERIENCE

Field experiences begin sophomore year, with a Service Learning experience in an area school. This continues into the junior year, when students take a practicum in a student's chosen content area. During the senior year, students complete a second practicum experience, followed by a student teaching experience in the subsequent semester.

Initial licensure programs are accredited by the Council for the Accreditation of Educator Preparation.

National Council on Teacher Quality

A+ rating from the National Council on Teacher Quality

AFFORDABLE EDUCATION

\$16,000

TEACH GRANT

The College Cost Reduction and Access Act of 2007 created the Teacher Education Assistance for College and Higher Education (TEACH) Grant program which will allow eligible students to be awarded up to \$4,000 per year (Maximum \$16,000 during a 4-Year Program). For eligibility requirements, visit msj.edu/grants.
